linkedin.com/in/kritikmahesh | github.com/kritikmahesh

PROFESSIONAL SUMMARY

AI/ML Engineer and Computer Science graduate (MAHE Dubai, AI & ML specialization) with hands-on experience building machine learning pipelines, generative AI applications, and full-stack systems using Python, TensorFlow, Keras, and OpenCV. Former core member of IEEE and Google Developer Student Clubs (GDSC), with a track record of hackathon, CTF and competitive-programming placements (IEEEXtreme, Hack The Box, RIFT CTF, MakeX Robotics) and a Best Paper Award-winning AI research paper. Seeking to apply strong foundations in deep learning, NLP, computer vision, and prompt engineering to deliver production-grade AI solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, JavaScript, SQL

Machine Learning & Deep Learning: TensorFlow, Keras, Scikit-learn, Supervised & Unsupervised Learning, Model Training & Evaluation, Hyperparameter Tuning, Feature Engineering

Generative AI & NLP: Prompt Engineering, LLM APIs, Natural Language Processing (NLP), Text Classification, Tokenization, Sentiment Analysis

Computer Vision: OpenCV, Image Classification, Neural Networks (CNNs)

Data & Visualization: NumPy, Pandas, Matplotlib, Data Preprocessing, Exploratory Data Analysis

Web, Systems & Databases: HTML, CSS, JavaScript, Firebase, SQL, DBMS, Linux, Windows

Tools & Platforms: Git, GitHub, AWS (Generative AI Applications), Version Control, Agile Collaboration

PROFESSIONAL EXPERIENCE

Amira AI — AI Engineering Intern *Jun 2026 – Present*
Dubai, UAE

- Spearheaded development of a production conversational AI chatbot, designing and optimizing the backend workflows that power it.
- Partnered with technical leadership to architect and evaluate complex, scalable AI system designs for production use.

Prodigy InfoTech — Generative AI Intern *Aug 2025 – Sep 2025*
Remote

- Developed generative AI applications using advanced prompt engineering techniques to produce structured, meaningful outputs.
- Integrated and tested AI APIs within Python-based applications, maintaining clean, version-controlled codebases via Git/GitHub.

Coding Samurai — Machine Learning Intern *Jul 2025 – Aug 2025*
Remote

- Built and evaluated machine learning models, applying systematic data preprocessing, feature selection, and hyperparameter tuning.
- Improved model accuracy through iterative experimentation, cross-validation, and performance benchmarking against baseline models.

IEEE MAHE Dubai — Core Team Member *Jun 2023 – Jun 2025*
Dubai, UAE

- Organized technical workshops, hackathons, and IEEE events, contributing to student-led research and innovation initiatives.

Google Developer Student Clubs (GDSC) — Core Team Member *Sep 2023 – Jan 2025*
Dubai, UAE

- Led community-driven technical sessions and workshops, supporting peer learning, hands-on skill-building, and developer community growth.

PROJECT WORK

MNIST Handwritten Digit Recognition — Machine Learning / Computer Vision *Aug 2025*

- Designed and trained a convolutional neural network for handwritten digit classification on the MNIST dataset (60,000 training images).
- Applied data preprocessing, regularization, and hyperparameter tuning to reduce overfitting and improve generalization performance.

- Tools: Python, TensorFlow, Keras, NumPy, Matplotlib

Sentiment Analysis on Tweets — Natural Language Processing *Aug 2025*

- Built an NLP pipeline to classify tweets as positive, negative, or neutral using supervised learning techniques.
- Engineered text preprocessing steps (tokenization, stop-word removal, TF-IDF vectorization) to improve classification accuracy.
- Tools: Python, Scikit-learn, NLP, Pandas

Text Generation with Markov Chains — Generative AI *Aug 2025*

- Built a probabilistic text-generation system using Markov Chains to produce context-aware sequences from a training corpus.
- Designed the algorithm and data model from scratch with clean, documented, reusable code.
- Tools: Python, Algorithm Design, Data Modeling

EDUCATION

Manipal Academy of Higher Education (MAHE) — B.Tech, Computer Science Engineering *2022 – 2026*
Dubai, UAE | *CGPA: 8.9/10* | *Specialization: Artificial Intelligence and Machine Learning*

CERTIFICATIONS

- Generative AI & Prompt Engineering — Dubai Future Foundation (1 Million Prompters Program)
- AWS Generative AI Applications Professional Certificate — Amazon Web Services (Coursera)
- AI For All (AI Aware stage) — Intel, with CBSE and Digital India
- Tata GenAI Powered Data Analytics Job Simulation — Forage
- Introduction to IoT and Digital Transformation — Cisco Networking Academy

ACHIEVEMENTS & PUBLICATIONS

- AEIT 2025 Best Paper Award — "NeuroSense: Real-Time Cognitive Load Detection via Facial Expressions and EEG Simulation"
- KHDA E33 CoLabs 2025 — Recognized by the Knowledge & Human Development Authority, Government of Dubai, for contributions to inclusive, future-ready education initiatives
- RIFT: Capture the Flag 2025 (GDG On Campus, BITS Pilani Dubai) — 2nd place out of 22 teams
- Cyber Apocalypse CTF 2025 (Hack The Box) — Ranked 468th globally out of 6,000+ teams
- AI vs Human CTF 2025 (Hack The Box) — Ranked 38th out of 404 teams, 18 of 20 challenges solved
- IEEEXtreme 18.0 24-Hour Programming Challenge (2024) — 8th place nationally, among 19,000+ participants
- MakeX Robotics Competition 2023 & 2024 — Runner-Up (2nd Place), two consecutive years

LANGUAGES

English, Hindi, Malayalam, Telugu, Marathi
